Your Complete Outdoor Site Furnishing Solutions

Bike Racks, Benches, Skateboard Racks, Trash & Recycling Cans and More!

Our Story

Started back in the late 90's, as a manufacturer of bike racks, Parkitect was started in 2016 to manufacture and sell their own bike racks. With over 20 years of experience in manufacturing bike racks, Parkitect is fully committed to the green parking industry.

A family owned company, Parkitect prides themselves in developing Green products for healthier communities by lowering traffic congestion and emission. From bike and skateboard racks to benches, trash and recycling and other site furnishings, Parkitect is working to bring additional products to the market to help in the Go Green movement.

Studies have shown that implementing bike infrastructure such as bike lanes and on-street bike racks in business districts noticeably increases local business traffic. Keep in mind that one on-street parking spot offers convenient parking for one car. Safe bike parking can do the same in a highly concentrated area, but more bikes can park outside of a business' front door by installing a bike rack that can hold from 2-15+ bikes - more efficient than that one car parking space.

"Our dedication to building healthier communities by lowering traffic congestion, emissions and car parking by providing Green parking is a top priority. Our company is committed to healthier living for all by providing the infrastructure needed to make this possible" stated founder Randy Polzin.

We are in a unique industry, said owner Marc Volk. "We have the ability to change the way people think by the long-lasting green products we make."

"Our goal is to give cities, parks, private and public business, churches, golf courses and others the opportunity to Go Green by buying our products" said owner, Jason Polzin.

With a rich history in the industry, Parkitect is dedicated to leading the Go Green Movement by being your complete outdoor site furnishings solution.

Parkitect Bike Parking Guidelines

Be a Part of the Green Transportation Movement

Let your community know your company or organization is committed to promoting sustainable transportation by providing safe, secure parking for bicycles and other non-motorized vehicles. Offering properly designed, placed and cared for bicycle parking encourages cyclists to visit your destination, knowing they will have a safe area to secure their valuable property. Safe, convenient parking also keeps sidewalks accessible, trees from being damaged and shows your commitment to the health of the local environment and community.

If you are planning a new or re-imagined street scape or transit-oriented project, taking into consideration the needs of human powered transportation, specifically bicycles and skateboards, demonstrates your commitment to active, healthy lifestyles.

Bikes Mean Business

Consistently, studies have shown that implementing bike infrastructure such as bike lanes and on-street bike racks in business districts noticeably increases local business traffic. It's simple if you think about it. Each on-street parking spot offers convenient parking for one person or family. Safe, convenient bike parking can do the same – but in a highly concentrated area. Many more bikes than cars can park outside a businesses' front door.

Biking Builds Better Communities

Urban planning experts agree that moving commuters out of their cars and into active modes of transportation like biking means less traffic congestion, lower costs for building and maintaining car parking, and improved health of the local community. Building biking infrastructure into your project can mean much more than a safe place to lock up a bicycle.

GUIDELINES

Where to Start

For a bicycle parking system that is safe, secure and orderly, each parking location should offer these minimums.

1. Be securely anchored to either the ground or your building.
2. Allow both the bicycle frame and at least one wheel of the bike to be safely secured to the rack with a U-style lock, as many front wheels offer “quick removal.”
3. Allow at least two points of contact between the rack and the bike, to help support the bike's frame, lessening the chance of damage to the bicycle.
4. Provide ample space between bike positions to realistically accommodate a bicycle locked in every spot.

Parkitect makes it easy

With decades of experience providing quality, secure bike parking, Parkitect can help you with all the planning to make your bike parking project a success. If you have more questions on bike parking guidelines, please contact us. Complimentary site/plan consultations are available for any project.

Bike Racks Mounting Options

Surface Mount

The bike rack is attached using heavy-duty screws to superficially secure the rack to the concrete pad

In-Ground Mount

The bike rack is secured into the ground using concrete for maximum support.

Rail Mount

The bike racks are attach to two rails. These rails can be set on grass or woodchips and are able to be moved. Looking to secure your rail mount bike rack? You can use heavy-duty screws to secure to a concrete pad. Due to weight we recommend no more than seven racks per rail system.

Bike racks available for rail mount: Arch, Radius, and Drift

Finishing Options

Powder Coat

Powder coat: Powder coating is a metal coating that is applied to a metal surface as a dry color powder. It is applied electrostatically — using a magnetic field to apply paint to metals — before baking it onto the surface using heat. This creates a hard finish that is tougher than conventional paint. Below are the powder coat colors we offer. Not seeing the color you need? Give us a call.

Thermoplastic

Thermoplastics are a type of plastic polymer material that is applied to our products through a fluidized bed dipping. Thermoplastic becomes moldable at a certain high temperature and then solidifies after cooling. Below are the thermoplastic colors we offer. Need a different color? Give us a call.

Galvanized

Galvanization is the process of applying a protective zinc coating to steel to prevent rusting. It is hot-dipped, which means the product is submerged in a bath of hot, molten zinc to get the protective covering.

Stainless

Stainless steel metal is formed when the raw materials of nickel, iron ore, chromium, silicon, molybdenum, and other metals are melted together. When fused, they create a powerful alloy that is corrosion-resistant. The metal then goes through a buffing process where it receives its shiny appearance.

ARCH

LIMITED SPACE? Simple and space saving, this thick pipe constructed, A-Frame design allows for dual bike parking and allows for two-point security with any U-lock. Use alone, in a group, or as part of a bike corral by mounting multiple units together on a rail system.

Dimensions: 26" length × 33" height × 1.9" tube diameter

Capacity: 2 bikes

Finish Options:

Powder Coat: Surface Mount: \$106.00; In-Ground Mount: \$110.00

Galvanized: Surface Mount: \$124.00; In-Ground Mount: \$128.00

Thermoplastic: Call for pricing

Stainless: Call for pricing

ARCH PRO

EXTRA SECURITY! Simple and stylish, this A-Frame design allows for dual bike parking and allows for two-point security with any U-lock. The pro-version is constructed of larger and thicker pipe for extra security.

Dimensions: 26" length × 33" height × 2.375" tube diameter

Capacity: 2 bikes

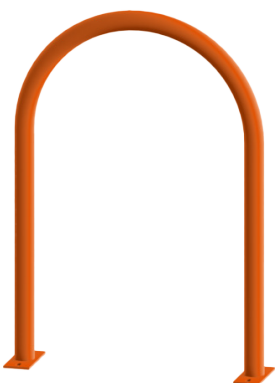

Finish Options:

Powder Coat: Surface Mount: \$152.00; In-Ground Mount: \$149.00

Galvanized: Surface Mount: \$154.00; In-Ground Mount: \$157.00

Thermoplastic: Call for pricing

Stainless: Call for pricing

RADIUS

CLASSIC LOOK! Parkitect's Radius rack is a classic hoop design that gives riders an easy place to park, and thieves a hard product to defeat. U-lock compatible and allows for two points of bike support. For mobile or bike corral usage, multiple units can be rail mounted. Use alone, in a group, or as part of a bike corral by mounting multiple units together on a rail system.

Dimensions: 25" length × 34" height × 1.9" tube diameter

Capacity: 2 bikes

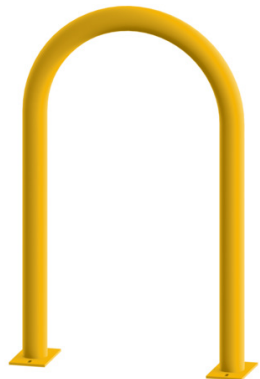

Finish Options:

Powder Coat: Surface Mount: \$103.00; In-Ground Mount: \$101.00

Galvanized - Surface Mount: \$125.00; In-Ground Mount: \$125.00

Thermoplastic: Call for pricing

Stainless: Call for pricing

RADIUS PRO

BEEF IT UP! Parkitect's Radius Pro is a heavy-duty version of our classic hoop design. Formed from even larger, thicker pipe than our original. U-lock compatible and allows for two points of bike support. Use alone, in a group, or as part of a bike corral by mounting multiple units together on a rail system.

Dimensions: 23" length × 35" height × 2.375" tube diameter

Capacity: 2 bikes

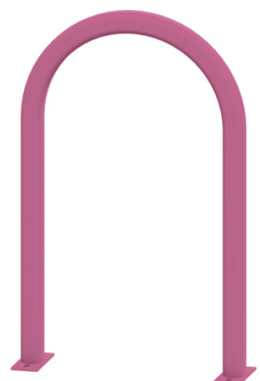

Finish Options:

Powder Coat: Surface Mount: \$151.00; In-Ground Mount: \$148.00

Galvanized - Surface Mount: \$174.00; In-Ground Mount: \$173.00

Thermoplastic: Call for pricing

Stainless: Call for pricing

RADIUS SQUARED

UNBELIEVABLE PROTECTION! Parkitect's Radius Squared is a classic hoop design that gives riders an easy place to park, and the square tube design proves pipe cutter proof to thieves. U-lock compatible and allows for two points of bike support. Use alone, in a group, or as part of a bike corral by mounting multiple units together on a rail system.

Dimensions: 22" length × 34" height × 2" tube width

Capacity: 2 bikes

Finish Options:

Powder Coat: Surface Mount: \$231.00; In-Ground Mount: \$227.00

Galvanized: Surface Mount: \$255.00; In-Ground Mount: \$251.00

RADIUS RACK WITH CUSTOMIZED LOGO

MAKE A STATEMENT! Add a personal touch with a custom logo insert to represent your business, establishment or city. Add some flare to your bike rack with a laser cut logo. We will work with you to create a custom logo that you will love. Call us to order your customized Radius Rack with logo.

Dimensions: 25" length × 34" height × 1.9" tube diameter

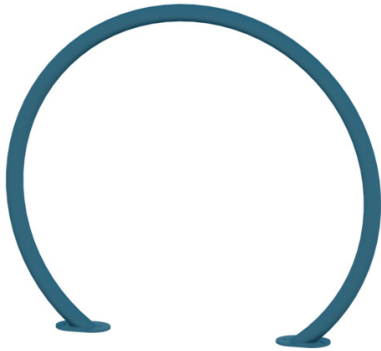

Capacity: 2 bikes

Finish Options:

Powder Coat: Surface Mount: Starting at \$240.00; In-Ground Mount: Starting at \$240.00

Galvanized - Surface Mount: Starting at \$262.00; In-Ground Mount: Starting at \$262.00

Thermoplastic: Call for pricing Stainless: Call for pricing

SUNRISE

LET THE SUN SHINE! Parkitect's Sunrise is the bike parking equivalent to a perfect circle. Simply beautiful and equally functional, the Sunrise is the perfect finishing piece to any outdoor design project where a clean, orderly and of course, secure bike parking area is a requirement. A stunning addition whether alone or grouped.

Dimensions: 40" length × 34" height × 1.9" tube diameter

Capacity: 2 bikes

Finish Options:

Powder Coat: Surface Mount: \$194.00; In-Ground Mount: \$190.00

Galvanized: Surface Mount: \$200.00; In-Ground Mount: \$196.00

Thermoplastic: Call for pricing

Stainless: Call for pricing

SUNRISE PRO

BRING ON THE FUN! Parkitect's Sunrise Pro is constructed of larger and thicker pipe for extra security. Simply beautiful and equally functional, the Sunrise Pro is the perfect finishing piece to any outdoor design project where a clean, orderly, and of course, secure bike parking area is a requirement. A phenomenal addition whether placed alone or as a group.

Dimensions: 42" length × 35" height × 2.375" tube diameter

Capacity: 2 bikes

Finish Options:

Powder Coat: Surface Mount: \$297.00; In-Ground Mount: \$316.00

Galvanized: Surface Mount: \$326.00; In-Ground Mount: \$345.00

Thermoplastic: Call for pricing

SUNRISE SQUARED

TURN THAT FROWN UPSIDE DOWN! Parkitect's Sunrise Squared offers a different look from the Sunrise and Sunrise Pro. Extremely secure parking, Sunrise Squared makes for a beautiful addition to your street scape alone or when grouped. Chose one color or a variety to make a statement. The square tube design proves pipe cutter proof to thieves and will easily stand years of changing seasons.

Dimensions: 40" length × 34" height × 2" tube width

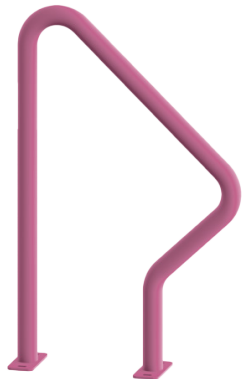

Capacity: 2 bikes

Finish Options:

Powder Coat: Surface Mount: \$407.00; In-Ground Mount: \$386.00

Galvanized: Surface Mount: \$438.00; In-Ground Mount: \$388.00

Thermoplastic: Call for pricing Stainless: Call for pricing

DRIFT

STYLISHLY STRONG! Parkitect's Drift bike rack utilizes an extremely secure, battle-tested design that bends in all the right places. Thick pipe construction and two full radius bends provide a stylish and strong bike rack. This rack offers two-point bike support and U-lock compatibility. Use alone, in a group, or as part of a bike corral by mounting multiple units together on a rail system.

Dimensions: 21" length × 35" height × 1.9" tube diameter

Capacity: 2 bikes

Finish Options:

Powder Coat: Surface Mount: \$137.00; In-Ground Mount: \$135.00

Galvanized: Surface Mount: \$147.00; In-Ground Mount: \$147.00

Thermoplastic: Call for pricing

Stainless: Call for pricing

SLOPE

UNIQUE LOOK! Equally artistic and functional, the slope is the perfect finishing piece to any outdoor design project where elegance and security are a requirement. The slope design aligns with bike shapes for the needed two-point bike support and U-lock compatibility. A perfect addition grouped or alone.

Dimensions: 60" length × 33" height × 1.9" tube diameter

Capacity: 2 bikes

Finish Options:

Powder Coat: Surface Mount: \$183.00; In-Ground Mount: \$183.00

Galvanized: Surface Mount: \$183.00; In-Ground Mount: \$183.00

Thermoplastic: Call for pricing

Stainless: Call for pricing

MOTION

GET MOVING! Parkitect's Motion evokes the shape of the ancient Greek letter "Phi" and delivers with classic bike parking safety. The beautiful combination of a full radius circular bend with the centered vertical bar creates a tight confine that proves nearly impossible for bike thieves to cut with traditional pipe cutters. The trim use of space allows for use in almost any location.

Dimensions: 18" length × 45" height × 2.375" tube diameter

Capacity: 2 bikes

Finish Options:

Powder Coat: Surface Mount: \$164.00; In-Ground Mount: \$164.00

Galvanized: Surface Mount: \$172.00; In-Ground Mount: \$172.00

Thermoplastic: Call for pricing

Stainless: Call for pricing

SKYSCRAPER PRO

SLEEK AND MODERN! Parkitect's Skyscraper Pro has round tubing unlike its relative Skyscraper Squared. Skyscraper Pro gives you the strongest defense against thieves with its 2" tube diameter. Park your bike with confidence on this bike rack using any u-lock style bike lock.

Dimensions: 29" length × 36" height × 2.375" tube diameter

Capacity: 2 bikes

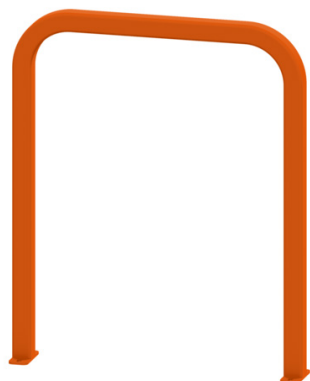

Finish Options:

Powder Coat: Surface Mount: \$186.00; In-Ground Mount: \$190.00

Galvanized: Surface Mount: \$208.00; In-Ground Mount: \$208.00

Thermoplastic: Call for pricing

Stainless: Call for pricing

SKYSCRAPER SQUARED

SIMPLE BUT STRONG! Parkitect's Skyscraper knows all about the rough and tumble streets of the city. With its square-tube construction, Skyscraper is impervious to traditional pipe cutters, and its extended width makes bike parking feel as simple and safe as parking at home.

Dimensions: 30" length × 36" height × 2" squared

Capacity: 2 bikes

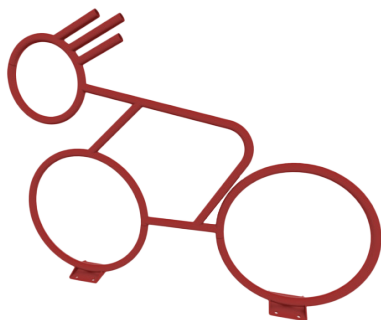

Finish Options:

Powder Coat: Surface Mount: \$249.00; In-Ground Mount: \$238.00

Galvanized: Surface Mount: \$318.00; In-Ground Mount: \$318.00

Thermoplastic: Call for pricing

Stainless: Call for pricing

FAST BIKER

DON'T BLINK! Parkitect's Fast Biker looks like he/she is racing down the street at a high rate of speed. Add some variety with a mix of our biker and fast bike along with pop of color to an area. This rack allow for two-point security with any U-lock.

Dimensions: 63" length × 48" height × 1.5" tube diameter

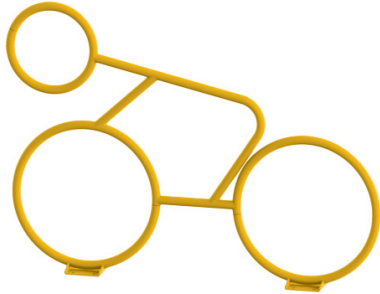

Capacity: 2-4 bikes

Finish Options:

Powder Coat: Surface Mount: \$558.00; In-Ground Mount: \$558.00

Thermoplastic: Call for pricing

Bike Racks

BIKER

LET'S RIDE! Who says bike parking can't be fun? Place this outside of an office, a green space area or your local park. Place one or many in one or a variety of colors. This rack allows for two-point security with any U-lock.

Dimensions: 63" length × 45" height × 1.5" tube diameter

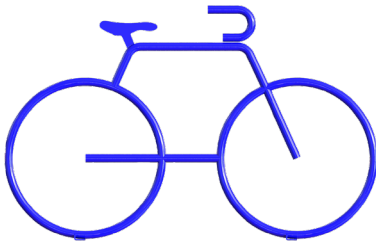

Capacity: 2-4 bikes
